# Groundworks™ NATURAL ICEMELTER

## POWERFUL to -23°C (-9°F)

GroundWorks Natural™ Icemelter works effectively to -23°C (-9°F), melting ice and snow even in the toughest winter conditions.

## CONCENTRATED POWER

GroundWorks Natural™ Icemelter begins to work immediately. Use 50 - 100 grams per square meter (1/4 - 1/2 cup per square yard).

## SAFE on LAWNS and PLANTS

GroundWorks Natural™ Icemelter is a fertilizer-based product that will not harm vegetation or soil structure, when used as directed. It is harmless on groundwater systems.

## SAFE on CONCRETE

GroundWorks Natural™ Icemelter does not chemically affect quality air entrained concrete or treated wood. It allows for a greater volume of water to evaporate, assisting in the prevention of damage to concrete associated with freeze/thaw cycles.

## PET SAFE

GroundWorks Natural™ Icemelter is completely safe for use around children and pets.

## NO MESSY RESIDUE

GroundWorks Natural™ Icemelter does not leave an oily residue. It reduces to a colorless and odourless liquid with a more neutral pH balance.

## SAFE to HANDLE

GroundWorks Natural™ Icemelter will not harm humans or animals. It is safe to handle. Gloves are optional. WHMIS exempt in Canada. OSHA exempt in USA.

## UREA FREE

Beware, many pet friendly icemelers contain Urea, whereas Groundworks Natural™ Icemelter is completely Urea Free. Urea is very harmful as it contains nitrogen and when exposed to the environment, breaks down and becomes ammonia. This is very toxic to aquatic life even at low levels.

## LONG SHELF LIFE

GroundWorks Natural™ Icemelter will not lose its effectiveness during prolonged storage or when opened. It does not require special storage facilities nor special handling procedures that are common to many other ice melting products.
