1-800-MELT-ICE

ARCTIC BLUE™ ICEMELTER

Arctic Blue Icemelter™ is a manufactured commercial grade product combining four powerful ingredients that will attack and melt your ice fast. Trusted by professionals across the North, you can rely on the proven performance of Arctic BLUE.

Fast Melting

Arctic BLUE Icemelter™ delivers fast melting performance. The product is triple-screened for more even distribution, allowing for consistent coverage while using less material compared to many other icemelters on the market. The product begins working as soon as it comes in contact with the ice.

Effective to -32°C (-26°F)

Arctic BLUE Icemelter™ contains four powerful ingredients that allow it to be effective down to very low temperatures. When melting power matters most, Arctic BLUE delivers.

Powerful QUAD-Formula

Arctic BLUE Icemelter™ is a manufactured product, not a simple blend, making it more powerful than many alternatives on the market. Each granule contains, Sodium, Calcium, and Magnesium (MAG) Chlorides plus CMA. This quad-formula delivers the strength needed to perform in the toughest winter conditions.

Commercial Grade Quality

Formulated specifically for commercial applications, Arctic BLUE provides a high-performance de-icing solution for environments that demand reliability and results. It is used by many commercial institutions in the North.

Blue Color for Accurate Application

Arctic BLUE Icemelter™ contains an ECO-friendly blue dye so that the product can easily be seen while being spread, leading to more accurate application. This visibility ensures more accurate spreading, reduces over-application, and helps minimize potential liability.

Gentle on the Environment

Arctic BLUE Icemelter™ contains CMA, which helps reduce environmental impact. CMA is commonly specified for eco-conscious and low-impact facilities. Each granule is treated for enhanced performance, offering advantages over traditional blended products.
